**SMI program fills  
missing link**

Klein and Associates

Dear Steve,

I just wanted to drop a note to let you know some of the positive changes that have occurred since mid March when I started the Dynamics of Personal Goal Setting. My practice has increased 51% from Feb. 28 to Apr. 30. I have started exercising 3 to 4 times a week for the last 6 weeks and am getting stronger every day. I've started going to work an hour early each morning and studying for 30 minutes and getting a head start on my day. I have finally been able to begin organizing and focusing on specific plans for the future both short and long term. The program has really helped fill a missing link I've had the last few years and I have very positive thoughts about how my future will be. Thank you for the support and interest in helping me reach my goals.

Sincerely,

*Jim*  
James B. Ward D.C.

#### POSITIVE CHANGES:

- Increased business 51%
- Exercising 3 to 4 times a week
- Getting a head start on the day
- Focus on specific plans
